

STATE LEVEL ENVIRONMENT IMPACT ASSESSMENT AUTHORITY

Environment department, Room No. 217, 2nd floor, Mantralaya, Annexe, Mumbai- 400 032. Date:March 26, 2019

To.

Mr. ARVIND JAIN through Pride builders LLP

at S. No. 129/1, 1 2 9 / 2 , 1 3 0 / 1 + 2 a + 2 b + 2 c + 3 , 1 3 1 / 1 (p), 132/1, 132/2,132/3, 132/4, 132/5, 132/6, 132/7A, 132/7B, 132/7C, 132/8, 1 3 5 / 1 , 1 3 8 , 1 3 9 , 1 4 1 / 1 , 1 4 1 / 2 / 2 At Charholi BK, Dist.-Pune, State - Maharashtra.

 $\textbf{Subject:} \quad \text{Environment Clearance for Residential \& Commercial Project}$

Sir,

This has reference to your communication on the above mentioned subject. The proposal was considered as per the EIA Notification - 2006, by the State Level Expert Appraisal Committee-III, Maharashtra in its 82nd meeting and recommend the project for prior environmental clearance to SEIAA. Information submitted by you has been considered by State Level Environment Impact Assessment Authority in its 161st meetings.

2. It is noted that the proposal is considered by SEAC-III under screening category 8 b(B1) as per EIA Notification 2006.

Brief Information of the project submitted by you is as below:-

1.Name of Project	PRIDE WORLD CITY						
2.Type of institution	Private						
3.Name of Project Proponent	Mr. ARVIND JAIN through Pride builders LLP						
4.Name of Consultant	M/s. Ultra-Tech (Environmental Consultancy & Laboratory)						
5.Type of project	Housing						
6.New project/expansion in existing project/modernization/diversification in existing project	Modernization (Deletion of plots)						
7.If expansion/diversification, whether environmental clearance has been obtained for existing project	EC letter received vide Moef Delhi letter no.21-9/2007-IA.III dated 17 January 2008 for plot area 15,74,232 m2 Revalidation done on dated 12 May 2014. Valid till 16th Jan 2020.						
8.Location of the project	S. No. 129/1, 1 2 9 / 2 , 1 3 0 / 1 + 2 a + 2 b+ 2 c + 3 , 1 3 1 /1 (p), 132/1, 132/2,132/3, 132/4, 132/5, 132/6, 132/7A, 132/7B, 132/7C, 132/8, 1 3 5 / 1 , 1 3 8 ,1 3 9 , 1 4 1 / 1 , 1 4 1 / 2 / 2 At Charholi BK, DistPune, State - Maharashtra.						
9.Taluka	Haveli A D D D D D D D D D D D D D D D D D D						
10.Village	Charholi Bk						
Correspondence Name:	Arvind Jain						
Room Number:	near Pune university Circle, shivaji Nagar Pune						
Floor:	5th floor						
Building Name:	pride house						
Road/Street Name:	Pune university Circle						
Locality:	Pune						
City:	Pune						
11.Whether in Corporation / Municipal / other area	Pimpri chinchwad Municipal Corporation						

SEIAA Meeting No: 161 Meeting Date: March 15, 2019 (SEIAA-STATEMENT-0000001727) SEIAA-MINUTES-0000001754 SEIAA-EC-0000001441 Con-

Shri. Anil Diggikar (Member Secretary SEIAA)

Energy saving by non-conventional method:

- \bullet Use of LED in Parking area, lift-lobby and stair-case.
- Using Solar system in Common Area Lighting (10%). & Street/ Landscape lights with LED lamps.
- V3F drive is proposed for all lifts.
- \bullet As per MSEDCL requirements, it is recommended to use low loss Transformer.
- Losses for Transformer shall, in principal, comply with ECBC norms.
- Recommend to attain power factor of the installation near unity.
- Independent Energy meters for all pollution control equipment's.

CRZ/ RRZ clearance obtain, if any:	NA
Distance from Protected Areas / Critically Polluted areas / Eco-sensitive areas/ inter-State boundaries	NA
Category as per schedule of EIA Notification sheet	8 b(B1)
Court cases pending if any	No
Other Relevant Informations	Earlier EC was Received in 2007 from MoEF and CC Delhi for total plot area of 15,74,232 m2 We are applying for modernization of EC for a total plot area of 2, 96,199.67 m2 by deleting 1278032.33 m2.
Have you previously submitted Application online on MOEF Website.	No
Date of online submission	一、0美。人、当屋

3. The proposal has been considered by SEIAA in its 161st meeting & decided to accord environmental clearance to the said project under the provisions of Environment Impact Assessment Notification, 2006 subject to implementation of the following terms and conditions:

Specific Conditions:

I	
II	PP Shall comply with Standard EC conditions mentioned in the Office Memorandum issued by MoEF & CC vide F.No.22-34/2018-IA.III dt.04.01.2019.
III	PP to submit CER plan to Municipal Commissioner, Pune Municipal Corporation and submit the acknowledgement copy to submitted to Member Secretary, SEIAA.
IV	SEIAA decided to grant EC for : FSI: 298147.69 m2, Non FSI: 186485.78 m2 & Total BUA: 484633.47m2.

General Conditions:

General Conditions.	W. K.
I	E-waste shall bedisposed through Authorized vendor as per E-waste (Management and Handling) Rules, 2016.
п	The Occupancy Certificate shall be issued by the Local Planning Authority to the project only after ensuring sustained availability of drinking water, connectivity of sewer line to the project site and proper disposal of treated water as per environmental norms.
Ш	This environmental clearance is issued subject to obtaining NOC from Forestry & Wild life angle including clearance from the standing committee of the National Board for Wild life as if applicable & this environment clearance does not necessarily implies that Forestry & Wild life clearance granted to the project which will be considered separately on merit.
IV	PP has to abide by the conditions stipulated by SEAC& SEIAA.
V	The height, Construction built up area of proposed construction shall be in accordance with the existing FSI/FAR norms of the urban local body & it should ensure the same along with survey number before approving layout plan & before according commencement certificate to proposed work. Plan approving authority should also ensure the zoning permissibility for the proposed project as per the approved development plan of the area.
VI	If applicable Consent for Establishment" shall be obtained from Maharashtra Pollution Control Board under Air and Water Act and a copy shall be submitted to the Environment department before start of any construction work at the site.
VII	All required sanitary and hygienic measures should be in place before starting construction activities and to be maintained throughout the construction phase.
VIII	Adequate drinking water and sanitary facilities should be provided for construction workers at the site. Provision should be made for mobile toilets. The safe disposal of wastewater and solid wastes generated during the construction phase should be ensured.

SEIAA Meeting No: 161 Meeting Date: March 15, 2019 (SEIAA-STATEMENT-0000001727) SEIAA-MINUTES-0000001754 SEIAA-EC-0000001441

Page 11 of

Shri. Anil Diggikar (Member Secretary SEIAA)

IX	The solid waste generated should be properly collected and segregated. dry/inert solid waste should be disposed off to the approved sites for land filling after recovering recyclable material.
X	Disposal of muck during construction phase should not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
XI	Arrangement shall be made that waste water and storm water do not get mixed.
XII	All the topsoil excavated during construction activities should be stored for use in horticulture / landscape development within the project site.
XIII	Additional soil for leveling of the proposed site shall be generated within the sites (to the extent possible) so that natural drainage system of the area is protected and improved.
XIV	Green Belt Development shall be carried out considering CPCB guidelines including selection of plant species and in consultation with the local DFO/ Agriculture Dept.
XV	Soil and ground water samples will be tested to ascertain that there is no threat to ground water quality by leaching of heavy metals and other toxic contaminants.
XVI	Construction spoils, including bituminous material and other hazardous materials must not be allowed to contaminate watercourses and the dumpsites for such material must be secured so that they should not leach into the ground water.
XVII	Any hazardous waste generated during construction phase should be disposed off as per applicable rules and norms with necessary approvals of the Maharashtra Pollution Control Board.
xvIII	The diesel generator sets to be used during construction phase should be low sulphur diesel type and should conform to Environments (Protection) Rules prescribed for air and noise emission standards.
XIX	The diesel required for operating DG sets shall be stored in underground tanks and if required, clearance from concern authority shall be taken.
XX	Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards and should be operated only during non-peak hours.
XXI	Ambient noise levels should conform to residential standards both during day and night. Incremental pollution loads on the ambient air and noise quality should be closely monitored during construction phase. Adequate measures should be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB/MPCB.
XXII	Fly ash should be used as building material in the construction as per the provisions of Fly Ash Notification of September 1999 and amended as on 27th August, 2003. (The above condition is applicable only if the project site is located within the 100Km of Thermal Power Stations).
XXIII	Ready mixed concrete must be used in building construction.
XXIV	Storm water control and its re-use as per CGWB and BIS standards for various applications.
XXV	Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.
XXVI	The ground water level and its quality should be monitored regularly in consultation with Ground Water Authority.
XXVII	The installation of the Sewage Treatment Plant (STP) should be certified by an independent expert and a report in this regard should be submitted to the MPCB and Environment department before the project is commissioned for operation. Discharge of this unused treated affluent, if any should be discharge in the sewer line. Treated effluent emanating from STP shall be recycled/refused to the maximum extent possible. Discharge of this unused treated affluent, if any should be discharge in the sewer line. Treatment of 100% gray water by decentralized treatment should be done. Necessary measures should be made to mitigate the odour problem from STP.
XXVIII	Permission to draw ground water and construction of basement if any shall be obtained from the competent Authority prior to construction/operation of the project.
XXIX	Separation of gray and black water should be done by the use of dual plumbing line for separation of gray and black water.
XXX	Fixtures for showers, toilet flushing and drinking should be of low flow either by use of aerators or pressure reducing devices or sensor based control.
XXXI	Use of glass may be reduced up to 40% to reduce the electricity consumption and load on air conditioning. If necessary, use high quality double glass with special reflective coating in windows.
XXXII	Roof should meet prescriptive requirement as per Energy Conservation Building Code by using appropriate thermal insulation material to fulfill requirement.
	•

Page 12 of Shri. Anil Diggikar (Member Secretary SEIAA)

Energy conservation measures like installation of CFLs / TFLs for the lighting the areas outside the building should be integral part of the project design and should be in place before project commissioning. Use CFLs and TFLs should be properly collected and disposed offisent for recycling as per the prevailing guidelines/fulled of the required of the received of		
illumination during operation phase should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DC sets should be equal to the pick the combined capacity of all proposed DC sets. Use low sulphur diesel. The location of the DC sets may be decided with in consultation with Maharashtra Pollution Control Board. XXXV Noise should be controlled to ensure that it does not exceed the prescribed standards. During nighttime the noise levels measured at the boundary of the building shall be restricted to the permissible levels to comply with the prevalent regulations. XXXVII Traffic congestion near the entry and exit points from the roads adjoining the proposed project site must be avoided. Parking should be fully internalized doth on plable spice should be utilized. XXXVII Opaque wall should meet pose-riptive requirement as per Energy Conservation Building Code, which is proposed to be anadicary for all airconditioned spaces while it's supration for non-air-conditioned spaces by use of appropriate thermal insulation material to failful requirement. XXXVIII The building should have adoquated distance between them to allow unovernent of fresh air and passage of natural light, and verification phases so as to avoid disturbations to the surroundings. XXXII Regular supervision of the above and office measures for monitoring should be in place all through the construction phase's so as to avoid disturbations to the surroundings. XIII Under the provisions of Environment (Protection) Act, 1986, legal schon shall be initiated against the project proponent if it was found that construction of the project has been started without obtaining environmental clearance. XIII We proponent all ensure completion of STE, MSW disposal facility, grean belt development prior to occupation of the buildings. As agreed during the SEDA meeting, 1971 to explore possibility of utilizing excess or all proponents with the project management shall ensure completion to STE, MSW d	XXXIII	should be integral part of the project design and should be in place before project commissioning. Use CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/rules of the regulatory authority to avoid mercury contamination. Use of solar panels may be done to the extent possible like installing solar street lights, common solar water heaters system. Project proponent should install, after checking feasibility, solar plus hybrid non-conventional energy source as
noise levels measured at the boundary of the building shall be restricted to the permissible levels to comply with the prevalent regulations. Traffic congestion near the entry and exit points from the roads adjoining the proposed project site must be avoided. Parking should be fully internalized and no public space should be utilized. Opaque wall should meet prescriptive requirment at spe Enterity Conservation Building Code, which is proposed to be inandictory for all air-conditioned Spaces while it's expiration for non-air-conditioned spaces by use of appropriate thereval insulation material to right? equirment. XXXVII The building should have adequate distance between them to allow information for non-air-conditioned spaces by use of appropriate the herval insulation. Regular supervision of the above and other measures for monitoring should be in place all through the construction places, so as to avoid disturbance to the surroundings. Under the provisions of Environment (Protection) Act. 1986, legal action shall be initiated against the project proponent if it was found that construction of the floories has been started without obtaining environmental clearance. XIII Six monthly monitoring reports should be submitted to the Regional office MosE, Bhopal with copy to this department, and MPCB. Project proponent shall ensure completion of STE, MSW disposal facility, green belt development prior to occupation of the fluidings. As agreed during the SEDA meeting, PP to explore possibility of utilizing excess treated water in the adjacent area for gardening before dischording it into explore possibility of utilizing excess treated water (manure) should be treated by Organic Waste Converter and treated waste (manure) should be utilized in the existing premises for gardening. And, no well garbage will be disposed outside the premises. Local authority should ensure this. XLIVI Local body should ensure flatino occupation certification for operation of STP/MSW site etc. with due permission of MPCB. XLIVI Se	XXXIV	illumination during operation phase should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use low sulphur diesel. The location of the DG sets may be
avoided. Parking should be fully internalized and no public space should be utilized. Opaque wall should meet prescriptive requirement as per Energy Conservation Building Code, which is proposed to be inhightory for all air-conditioned spaces while it is aspiration for non-air-conditioned spaces by use of appropriate thermal insulation material to fulfil requirement. The building should have adequate distance between them to allow movement of fresh air and passage of natural light, air and ventilation. Regular supervision of the above and other measures for monitoring should be in place all through the construction phase, so as to avoid disturbance to the surroundings. XL Regular supervision of the above and other measures for monitoring should be in place all through the construction of the project has been started without obtaining environmental clearance. XLI Six monthly monitoring reports should be submitted to the Regional office MoEF, Bhopal with copy to this department and MPCB. Project proponent shall ensure completion of STP. MSW disposal facility, green belt development prior to occupation of the fulldings. As agreed during the SERA meeting, PP to explore possibility of utilizing excess treated water in the edipacent area for gradening before discharging it into sever line No physical occupation or allotment; will be given unless all above said engrommental infrastructure is installed and made functional including water requirement in Para 2. Prior certification from appropriate authority shall be obtained. XLIII Wet garbage should be treated by Organic Waste Converter and treated waste (manure) should be utilized in the existing premisses for gardening. And, no wet garbage will be disposed outside the premises. Local authority and MPCB. XLIV A complete set of all the documents submitted to Department should be forwarded to the Local authority and MPCB. LII	The proponent shall upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the Regional Office of MoEF, the respective Zonal Office of CPCB and the SPCB. The criteria pollutant levels namely; SPM, RSPM. SO2, NOx (ambient levels as well as stack emissions) or critical sector parameters, indicated for the project shall be monitored and displayed at a convenient location near the main gate of the company in the public domain.
LIII	The project proponent shall also submit six monthly reports on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) to the respective Regional Office of MoEF, the respective Zonal Office of CPCB and the SPCB.
LIV	The environmental statement for each financial year ending 31st March in Form-V as is mandated to be submitted by the project proponent to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of EC conditions and shall also be sent to the respective Regional Offices of MoEF by e-mail.

Shri. Anil Diggikar (Member Secretary SEIAA)

- 4. The environmental clearance is being issued without prejudice to the action initiated under EP Act or any court case pending in the court of law and it does not mean that project proponent has not violated any environmental laws in the past and whatever decision under EP Act or of the Hon'ble court will be binding on the project proponent. Hence this clearance does not give immunity to the project proponent in the case filed against him, if any or action initiated under EP Act.
- 5. In case of submission of false document and non-compliance of stipulated conditions, Authority/ Environment Department will revoke or suspend the Environment clearance without any intimation and initiate appropriate legal action under Environmental Protection Act, 1986.
- 6. The Environment department reserves the right to add any stringent condition or to revoke the clearance if conditions stipulated are not implemented to the satisfaction of the department or for that matter, for any other administrative reason.
- 7. Validity of Environment Clearance: The environmental clearance accorded shall be valid as per EIA Notification, 2006, and amendments by MoEF&CC Notification dated 29th April, 2015.
- 8. In case of any deviation or alteration in the project proposed from those submitted to this department for clearance, a fresh reference should be made to the department to assess the adequacy of the condition(s) imposed and to incorporate additional environmental protection measures required, if any.
- 9. The above stipulations would be enforced among others under the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and rules there under, Hazardous Wastes (Management and Handling) Rules, 1989 and its amendments, the public Liability Insurance Act, 1991 and its amendments.
- 10. Any appeal against this Environment clearance shall lie with the National Green Tribunal (Western Zone Bench, Pune), New Administrative Building, 1stFloor, D-, Wing, Opposite Council Hall, Pune, if preferred, within 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
